

Foundation Training Job Description

Grade	F2
Placement	Medical Microbiology
The type of work to expect and learning opportunities	Will gain some bench work experience and be based with the Microbiology StRs learning to do what they do - e.g. taking telephone calls under supervision and authorizing simple specimen types. At the end of the placement the Fy2 will understand more than they did previously about antibiotics and their prescriptions. There are ample opportunities to join root cause analyses, infection prevention meetings, ward rounds and do other placements e.g. infectious diseases, public health, infection prevention and GU medicine.
Where the placement is based	LGI Microbiology department
Educational and Clinical Supervisor(s) for the placement	Dr Nicola Young
Main Duties of the placement	To get a good feel for Microbiology/Infection Prevention as a whole as we feel this can be taken on to whatever career is eventually chosen by the FY2. Main duties as above.
Typical working pattern in this placement	Typical working pattern in this post involves being based with the StRs and attending ward round, meetings, placements as per each individual FY2's requirements/career aspirations. Occasionally Medical on call. No Microbiology on call. Expected to be in our department during the normal working day.
Employer	Leeds Teaching Hospitals NHS Trust

It is important to note that this description is a typical example of your placement and may be subject to change.
