

HEE Yorkshire and the Humber Foundation Schools

Guidance – Application Form for a F2 Academic Foundation Research Placement (YHAF2)

Year of Placement: August 2019 to August 2020

This form should be completed by the Academic F1 trainee and the Academic Clinical Supervisor who wishes to host the trainee for a 4 month academic research placement during the 12 month period August 2019 to July 2020. There will be an approval process for F2 academic placements, and projects will be assessed against standard criteria as agreed by the Foundation School Committees and Board.

Principles of the F2 Academic Foundation Placement:

- The Yorkshire and Humber Foundation School and the Medical School of the University of Sheffield, University of Leeds and Hull York Medical School (HYMS) have created 66 Academic F2 rotations, allowing 66 trainees the opportunity of an academic placement.
- These Academic F2 rotations provide the opportunity for trainees to work alongside senior academics and their research teams to develop their understanding of clinical and basic scientific research. Potential future clinical academic trainees can explore their aptitude for and enjoyment of working in an academic environment. For those who choose to, the post will provide time to obtain preliminary data and prepare for application to the next stage in the academic training pathway, the Academic Clinical Fellowship.
- Each Academic F2 rotation comprises three placements, each of 4 months duration (two clinical and one academic).
- Two placements will provide clinical training and deliver Foundation skills within specialist units at the NHS Trust(s) that are highly research-active. The third 4 month placement will be dedicated to research training or medical education training. This placement, although intended to have no service commitments, will provide opportunities if required, to help those trainees acquire the F2 competencies for successful completion of their F2 training period.
- A portfolio of potential supervisors within the Medical Schools will be made available to the Academic F1 trainees. These trainees will, wherever possible, be offered attachment to units whose research programme and clinical specialty most closely reflects their own current career aspirations. In the event that a trainee has an ongoing research project within the Medical School or has a prior research interest as an undergraduate, it may also be possible for them to continue with this work during their placement - this is subject to the availability of suitable supervision arrangements and where a “personal” project is being submitted, the application will be looked at carefully to make sure that appropriate competences will be met.
- In addition to being released for Foundation generic training, academic trainees will be offered the opportunity to attend other research training events organised by the Medical School.
- The F2 Academic Trainee will be expected to have completed a literature review, a presentation of his/her research and written up his/her research project within the 4 month academic placement. These three outputs will be formally assessed by their named Academic Clinical Supervisor.
- There is an annual Academic Presentation day, which is mandatory for all F2 Academic trainees. There will be the opportunity for trainees to either give an oral presentation (subject to a selection process) or poster presentation.
- The UKFPO have published a “Rough Guide to the Academic Foundation Programme” and a “Compendium of Academic Competences”. These are available on their website:
<http://www.foundationprogramme.nhs.uk/document/academic-compendium>
<http://www.foundationprogramme.nhs.uk/document/rough-guide-academic-foundation-programme>

- Hull York Medical School (HYMS) requires trainees to study a PG Certificate for trainees in a Medical Education placement and to complete a PG Certificate in Health Research and Studies for Research for those in a Research placement. These courses run over the 2 year Academic Foundation programme.
- University of Leeds has no Medical Education posts. All trainees complete a PG Certificate in Health Research and Studies
- Trainees in a University of Sheffield Research placement complete a PG Certificate in Clinical Research and those in a Medical Education placement complete a PG Certificate in Medical Education.

Medical Education posts already have agreed aims and outcomes and are not part of the academic research matching process.

Where there are a limited number of placements in each Research specialty, if there are a number of trainees that wish to do the same project, we will ask you to preference the placements in numerical order and you will be allocated by EPM/SJT/interview score.

If you have adequate support to complete a “new” project that is not listed, it will be considered via your application.

If a placement receives more applications than there are places (i.e.>3), student ranking in the application process will be the first criterion used to allocate applicants. You are asked to rank a minimum of 21 posts via the Oriel application programme.

Please note that there are 3 programmes in West Yorkshire that include a 4 month Academic GP placement. These are not included in the application process and can be preferred in the normal way.

Academic Trainee Placement Matching Timeline

Date	Event
Nov 2017	Interview for academic trainees, scoring and ranking
1 August 2018	F1 start
September 2018	Annual induction day for Academic trainees (check local arrangements) to allow <ol style="list-style-type: none"> 1) understanding of the process 2) Academic supervisors (and or deputies) to meet trainees 3) Academic supervisors to present previous projects and planned projects for 2019 4) Gain an understanding of the PG Cert
September 2018- April 2019	Academic trainees to meet with potential supervisors and agree applications using the application form
September 2018	SY Clinical Academic Society “An introduction to Academic Medicine “ evening – Sheffield University
3 and 4 October 2018	WY Academic Careers Event
1 April 2019	Deadline for submission for YHAF2 Placement Application Form
Throughout April 2019	Allocation meeting – local panel dates TBC
30 April 2019	Confirmation of F2 Placement from Foundation School
May 2019 - June 2019	Trainee to arrange to meet with their Academic supervisor

4 Month Placements Available in North Yorkshire and East Coast (NYEC)

Academic Research	21	Hull, Scarborough or York
Academic Medical Education	3	Hull
