Name:
Dr Bethany Jill Williams
Job Title:
Leadership and Management Fellow
in Digital Pathology
Supervisor:
Dr Darren Treanor

Aims of Post:
To design and implement a digital
pathology deployment
To develop a validation protocol for
pathologists to train in digital
pathology
To promote digital pathology

Summary of Post:
I successfully designed and project
managed Leeds Teaching Hospitals
NHS Trust's deployment of digital
pathology for the primary diagnosis of
breast specimens, whilst working on
an international collaboration to
produce a validation protocol for digital pathology. This successful pilot has
resulted in the Trust forming a collaborative research partnership with Leica
Biosystems to undertake a 100% digitisation project over the next few years. I
have hosted educational events on digital pathology for international and
national visitors, and presented my work on an international stage.

Achievements:
Publications:
**"A systematic analysis of discordant diagnoses in digital pathology
compared with light microscopy." Williams BJ,** DaCosta P, Goacher E,
Treanor D. Archives of Pathology and Laboratory Medicine
"A novel leadership fellowship in digital pathology" **BJ Williams**, DTreanor
J Pathol Inform 2016, 7:39 (1 September 2016)
International presentations:
Pathology Informatics 2016 Pittsburgh
Nordic Digital Pathology, 2015, 2016 Linköping, Sweden
Invited speaker:
Meeting of the Pathological Society of Great Britain (Belfast 2017)
Global Engage, (London, 2016, 2017)
Leica EMEA Sales Kick Off Meeting (Malta 2017)
Courses:
Porter Intensive Seminar, Harvard Business School, 2017
PGCert in Leadership and Management, University of Swansea, 2016
Roles:
National Cancer Research Institute's CM-Path Initiative – digital pathology
working group member
