

Quality Improvement workshop - back for 2022

24 March | Manchester

Come along to our course and gain new skills and a greater understanding of the process of improvement. You'll learn how to successfully manage projects through interactive group work and lectures.

Topics include:

- Understanding the problem
- Process mapping
- Engaging stakeholders
- Applying tools as PDSA cycles, run charts and driver diagrams

The course is suitable for anyone interested in learning more about QI, whether you're just starting to think about a project, or right in the middle of one.

Book with confidence

We know that the situation around planning to attend face-to-face education is uncertain. We have a flexible cancellation policy, and a backup plan of converting the programme to online if required, so you can book without worrying about the ever-changing situation.
