

## QUICK GUIDE

### Getting Started with OMS: Distance for COVID-19

# 1

## Software

Download and install the software:

[Windows](#)

or

[Mac](#)

To guide installation on Windows 10, see [installing the OMS Software \(Windows\)](#). (video PW: OM5 )

If you are encountering issues with installing the software, it is possible you may not have unzipped the download appropriately.

To guide installation on Mojave or Catalina, see [Installing the OMS Software \(Mac\)](#) (video PW: OM5 )

Identify the installer in your downloads folder, right-click, Open. Provide permission to install the OMS program (currently an unidentified developer to Apple).

# 2

## Web App

Set up your web app account

Look for email from [info@oxfordmedicalsimulation.com](mailto:info@oxfordmedicalsimulation.com) and follow instructions

Log in to Web App

Accessible by region  
[OMS Web App for the US](#)  
[OMS Web App for the UK](#)

Run scenarios

Find and click the "Scenarios" tab when logged in to the Web App

### Tips

- When logging into Web App, use Chrome for best results
- Make sure your laptop is plugged in whilst running the scenarios to optimize performance
- Please note, when using a Mac computer scenarios may take up to two minutes to load
- Watch videos [Running a Scenario On Screen](#) and [Understanding User Analytics](#) to help guide your use of the platform (( video passwords: OM5 )
