

**Name:**

Khurram Mustafa

**Job Title:**

Clinical Leadership fellow, research and innovation

**Supervisor:**

Dr. Jacqueline Andrews

**Aims of Post:**

Quality improvement

Raising research profile for Leeds Children's Hospital

Bridging gaps between senior management and paediatric trainees

**Summary of Post:** The year provided tremendous personal and professional development opportunities. I developed an understanding of different leadership styles, learnt negotiating techniques, self-direction and time management skills and built collaborations that were crucial in achieving tangible outcomes.

I became a gold trainer for quality improvement, designed and led various project in paediatrics and intensive care. I provide mentoring and regular teaching sessions for quality improvement methods and also redesigned part of leadership teaching at the University of Leeds.

**Achievements:** Completed mixed methods study investigating barriers for research involvement among paediatric trainees.

**QI projects:** ReCAP ( Reducing Cardiac Arrests on PICU ), Think Research (Improving research recruitment at LCH), Service Improvement on PICU with multi-disciplinary feedback

**Presentations:** World Summit on Paediatrics and FLP annual conference

**Posters:** FLP meeting
