Aims of the meeting

- Create a forum for trainees to develop their academic skills and improve clinical knowledge
- To share interesting clinical information and management related issues across the region, thereby creating a forum for debate in the form of lectures and workshops
- Provide education, training and feedback on the academic abstract submission process for postgraduate trainee paediatricians
- Provide a safe and friendly environment for trainees and consultants alike to become more involved in academic paediatrics, at every level
- Allow an opportunity for trainees to develop their oral and poster presentations skills
- Offer a showcase of postgraduate research and management of complex clinical cases
- Provide a regional platform on an annual basis for the paediatric specialties to disseminate knowledge and enhance education across various paediatric disciplines
- Recognise and appraise the success of research and good clinical care achieved regionally
- Engage and value the contributions of the entire paediatric academic community
