

## Self-Assessment Guidance 2022

The 2022 National Urology ST3 self-assessment scoring process will involve the prior publication of the scoring mechanism. Candidates will self-score as part of their application, and the verification of candidate's self-assessment scores will occur between applications closing and the interview date. The process is outlined in more detail below with further details available in the 2022 National Urology Handbook.

1. Information regarding the portfolio station and self-assessment will be published in advance of the interviews via this document, including:-
  - a. Structure of the station/interview
  - b. Questions
  - c. Marking scheme
  - d. Points available
2. Applicants will give themselves a self-assessment score as part of their application form. This will involve answering a series of multiple-choice questions. Details of the questions are available later in this document (*questions may appear slightly differently on the application form*).
3. All scores must only be based upon elements that have been completed and awarded by the closing date of applications on the 9<sup>th</sup> December 2021. Elements completed between the application closing date and the interview will not be accepted during self-assessment validation.
4. Candidates will be given a 7 day window to upload evidence to substantiate the answers given during Self-assessment. This evidence must be provided as a single PDF file per question, applicants will therefore be required to combine several documents into one PDF if supplying more than 1 piece of evidence for a single question. There is a 'Urology Self-Assessment Checklist 2022' available from the download section on the [National Urology recruitment webpage](#) for applicants to use whilst preparing their documents. More information is available in the 2022 National Urology Handbook, and full details of the self-assessment validation process will be supplied in to applicants in due course.
5. Your self-assessment evidence will be validated and scored online, applicants will then be provided with feedback containing details of any adjusted scores. Applicants will then have 72 hours to appeal their score, any appeals will be assessed by an appeals panel and their decision will be final.

### Please note:-

- If a candidate's self-assessment evidence is not provided in the specified format a score of zero will be awarded for that element of the portfolio.
- Candidates considered to have provided documents that are inaccurate, falsified, or contain private or confidential patient details will have evidence taken and be referred to a scrutiny panel. The scrutiny panel will be conducted by Health Education England Yorkshire and the Humber and the candidate will be offered an opportunity to explain their actions and provide supporting documentation. The result of the scrutiny panel may lead to one or more of, but not limited to, the following.
  - Candidate removed from the current round of National Urology recruitment.
  - Candidate being reported to the GMC.
  - Candidates current Trust and/or LETB/Deanery being notified.

**Marking:**

Only one bullet point/response for each question can contribute to the score.

**1) Postgraduate degrees and qualifications in medical science**

**Where a thesis of significant length (minimum of 2 years of full time study equivalent) and contribution to research can be demonstrated and an oral examination of the thesis can be demonstrated. It is important to recognise the UK degrees carry significant component of research and non-UK degrees need to demonstrate equivalence. A degree certificate alone without significant research will not be awarded the marks**
